

# *Zetrisil*

EPA Registration of the My-shield® Sanitizer/Disinfectant Product Line, with Zetrisil®, for treatment of surfaces is pending. The company has been informed by the EPA that these products have passed the testing phase and are in the final stages of approval. This final stage is primarily documentation and 'sign-off'.

In the interim, many companies, including large Fortune 1000 clients, are purchasing the My-shield® Cleaner Product Line. We cannot, and do not, make any general or specific sanitization/disinfection claims regarding our My-shield® Cleaner Product Line. You should know, however, that the formulation in our My-shield® Cleaner Product Line are identical in every respect to the My-shield® Sanitizer/Disinfectant Product Line and will be discontinued as soon as the final stage of EPA approval is completed.
