

# *Sanitization Station / Thermal Temperature Scanner*

We have developed a solution to ensure you, your customers, and your guests remain as safe as possible while still allowing for you to offer your business critical functions and solutions. We have developed a digital signage solution with a built in digital sanitizing station which is available in both touch and non-touch functionality.

This turnkey hardware / software solution is the perfect addition for retail, restaurant, hospitality, health, education or public venues, looking to convey digital messaging while providing essential health services to their guests.
